Roll No: 160124748064 Experiment No: 01 Date:23/07/2026 Page No. :

AIM:

Design and develop a simple personal portfolio website using HTML and CSS to showcase personal information, education, skills, projects, and contact details.

DESCRIPTION:

This project is a basic personal portfolio website built using only HTML and CSS. It includes well-structured sections such as About, Education, Projects, and Skills, along with a separate Contact page. The website provides a clean and user-friendly interface to present personal and professional information systematically. The navigation bar allows users to jump between sections, and the Contact button redirects users to a dedicated contact page where connection details are provided.

ALGORITHM:

1. Start.
2. Create the root folder for the project and initialize the index.html file.
3. Build the portfolio home page structure using semantic HTML tags.
4. Add distinct sections for About, Education, Projects, and Skills using div containers.
5. Create a separate contact.html page to hold contact details and a simple form.
6. Link the Contact button from the main page to the contact.html page using anchor tags.
7. Create a style.css file and link it to the HTML documents.
8. Apply CSS rules for styling fonts, colors, margins, padding, and layout.
9. Run the index.html file in a web browser to test functionality and visual alignment.
10. Stop.

Program:

/index.html

```
<!DOCTYPE html>
<html>
<head>
  <title>My Personal Webpage</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>

  <section class="hero">
    <div class="hero-text">
      <h1>Sai Harshith Veerla</h1>
      <h3>B.E. CSE (AI & ML) Student</h3>
      <p>
```

```
            I am pursuing <b>B.E.</b> in Computer Science Engineering
            (<b>Artificial Intelligence & Machine Learning</b>) at
            <b>Chaitanya Bharathi Institute of Technology (CBIT)</b>,
            Hyderabad. I enjoy developing web applications,
            solving programming problems, and learning new technologies.
          </p>
        </div>
        <div class="hero-image">
          <img src="image/hero-image.png" alt="Sai Harshith">
        </div>
    </section>

    <section>
        <div class="contact-box">
          <h2>My Portfolio</h2>
          <p>
