AIM:

To design and develop a web-based "CSE-AIML Study Portal" using HTML and CSS to organize and display academic resources, including subjects, assignments, and the weekly class timetable.

DESCRIPTION:

The CSE-AIML Study Portal serves as a centralized digital hub for students to access vital course information. The portal features a clean, professional interface built with HTML5 semantic tags and styled using CSS. It organizes information into primary sections including Subjects (displayed in grid cards), Assignments, and a comprehensive weekly Timetable.

ALGORITHM:

1. Start.
2. Initialize the project using an index.html file to define the document structure.
3. Create a header with a navigation menu and a hero section for the welcome message.
4. Create a section for subjects using a grid container to hold card elements.
5. Create a section for assignments, utilizing a similar grid structure for card displays.
6. Develop the section for the timetable using a table element with defined rows and columns for days and time slots.
7. Create a style.css file to define styling, including flexbox and grid layouts.
8. Link the CSS stylesheet to the HTML file and test the portal in a web browser to ensure accurate rendering.
9. Stop.

Program Code:

/index.html

```
<!DOCTYPE html>
